DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

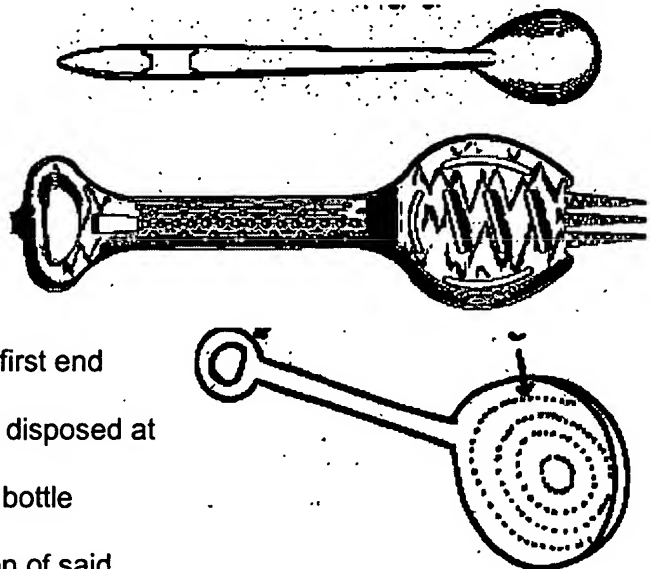

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by either one of Le Emmette V de Fee (US D 160,695) or Ford (US D45,189) and under 35 U.S.C. 102(a) as being anticipated by Hachiman (JP 02003 267 489).

Anyone of the above references, de Fee, Ford and Hachiman discloses all of the limitations of claim 1, i.e., a multipurpose implement comprising a handle means having a first end portion and a second end portion; a scoop means disposed at said first end portion of said handle means; and a bottle opener means disposed at said second end portion of said handle means. Wherein the bottle opener comprises a slot cast-in and the tool of a singular construction. Note that method of forming is not germane to the issue of patentability in an article claim.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over anyone of de Fee, Ford and Hachiman.

Each of de Fee, Ford and Hachiman meets all of the limitations of the above claims except for disclosing material used and the process of using the tool. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use polystyrenes or forged nickel-copper alloy, e.g., for high and low impact or exposure to see water, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Regarding claims 9 and 10, the use of above tools to open a bottle and to fill a glass with ice, a utility well within the knowledge of one of ordinary skill, for a drink on ice, meets the limitations.

Conclusion

5. Prior art made of record and not relied upon are considered pertinent to applicant's disclosure. Flynn; Sanford; Swenson; and Ressegger are cited to show related inventions.
